

## **Your INL Update — Week of August 16, 2010**

This is Misty Benjamin with your INL Update.

Idaho National Laboratory is keeping it cool for employees and cutting costs using light-colored materials for roof repairs or construction of new facilities at the Site. Buildings with cool roofs realize a significant reduction in the need for air conditioning.

Physics teachers spent some of their summer vacation at INL learning new tricks to keep students engaged during science lessons. INL scientists helped teachers perform experiments using common items. One experiment used marshmallows to calculate the speed of light. You can read this story in the features section of [INL.gov](http://INL.gov)

INL supports higher education this week, as employees participate in an event to educate new educators at Idaho State University. INL will take part in the social and offer information about the mission areas and the lab's contribution to education and economic success in Idaho.

This was your INL Update. You'll find more information at [INL.gov](http://INL.gov), including community announcements and the latest INL news.
