

Your INL Update — Week of Sept. 20, 2010

This is Nicole Stricker with your INL Update.

Television's Emmy Awards were announced a few weeks ago, but did you know that one of eastern Idaho's own was among the recipients? Idaho National Laboratory chemist Bruce Mincher won an Emmy for his involvement in the 14-part series titled "Understanding Chemistry in Our World." In the series, Mincher explained the science behind nuclear power. You can read more in a new feature story on INL's home page.

INL's future was the topic of the monthly Up 'n Atom Breakfast held by the local Partnership for Science & Technology. Rick Provencher, manager of the Department of Energy's Idaho Operations Office, was the featured speaker at Monday's event.

The YMCA Stonewall climbing gym got a facelift thanks to the efforts of dozens of community members including INL employees. Lab employee Tom Maddock mobilized INL resources in support of the effort.

This was your INL Update. You'll find more information at INL.gov, including community announcements and the latest INL news.
