

Your INL Update — Week of Nov. 8, 2010

This is Misty Benjamin with your INL Update.

The nation's first line of defense against cyber attacks is celebrating its first anniversary this week. The U.S. Department of Homeland Security chose Idaho National Laboratory to host the main operations center for its Industrial Control Systems Cyber Emergency Response Team (ICS-CERT). You can learn more about the team's accomplishments at INL's home page.

A club that embraces the cars of yester year also has a passion for the past and future of nuclear energy. A group of Model T enthusiasts spent a recent Saturday afternoon at INL's Experimental Breeder Reactor-I, the birthplace of nuclear energy. You can learn more about their trip in a new feature at INL.gov.

Local people are learning more about the area's diverse economy this week at the Bannock Development Corporation's Annual Economic Symposium. INL took part in the event by showcasing technology, research and deployment activities at the lab.

This was your INL Update. You'll find more information at INL.gov, including community announcements and the latest INL news.
