

UNIVERSITY OF IDAHO

Tom Wood

University of Idaho — Associate Professor
Center for Advanced Energy Studies — Associate Director

Dr. Wood, a faculty member in the Department of Geological Sciences located in Idaho Falls, currently serves as the CAES Geofluids Energy Sciences Core Capability lead. Dr. Wood holds a Ph.D. in Mining Engineering-Metallurgy from UI and joined the university as a faculty member in 2013.

Dr. Wood has long history of multi-institutional, interdisciplinary energy research that includes industry and national laboratory employment as both a scientist and manager, experiences which have prepared him for his new assignment to foster research collaborations and opportunities among investigators of the CAES member institutions.

Education

Ph.D., Mining Engineering-Metallurgy, University of Idaho
Master of Science, Geological Engineering, Washington State University
Bachelor of Science, Geophysics, Western Washington University
